

Read Me First

A quick, calm way to choose the right setup path before your first China arrival.

China Arrival Setup Bundle
Version 2.0 - Last reviewed 2026-07-29
00_READ_ME_FIRST.pdf

Use with current official information

Payment-app support, carrier rules, entry arrangements and transport operations can change. Verify the current official requirement that applies to your own trip before relying on a plan in this bundle.

Choose your setup time

15-minute essential setup

Choose a network option; install your primary payment app; save the hotel Chinese address; save your airport-to-hotel route; screenshot one offline emergency card.

30-minute recommended setup

Add a payment backup; install map, translation and ride-hailing apps; check your airport or station and hotel names; prepare a cash or physical-card fallback.

60-minute complete setup

Complete the payment, app, network, address, transport, first-24-hours, offline-card, troubleshooting and personal Arrival Sheet modules.

Open these files in this order

01 - China Arrival Setup Guide	Your end-to-end pre-arrival sequence, complete standards and first-24-hours plan.
02 - Payment & Apps Setup Guide	The complete current \$7 guide. It is included, not a shortened duplicate.
03 - Mobile Quick Cards	Large, bilingual cards for your phone gallery or printout.
04 - My China Arrival Sheet	A fillable personal plan saved locally on your device.
05 - Troubleshooting Decision Trees	Five short flows for common first-day failures.
06 - Offline Checklist and Sources	Time-ordered checklists plus the source and update log.

Important limitations

- This is practical travel-planning information, not visa, immigration, legal, financial, medical or insurance advice.
- Payment platforms, banks, apps and network providers can require verification or decline a transaction. Keep a backup.
- For an emergency, contact the relevant official authority, carrier, hotel or local staff rather than relying on this PDF alone.
- Check the product page for the latest available version. This product does not promise lifetime updates or automatic email delivery.
